In-case formatting is off on your pc, this is the original format of the site (as I have a desktop, it scales images differently compared to smaller desktops)

Due to technical problems I wasn't able to incorporate the site onto wordpress. I uploaded offline html files directly to the DIGM server. If the site cannot be accessed from the DIGM server, I have included an offline submission of the files. Just click on the covindicator's home page html file from the zip using a browser and the entire site will display.
